This is the loose-leaf version of Applied Sport Management Skills, Fourth Edition With HKPropel Access, which offers students a less expensive, printed version of the text. Applied Sport Management Skills, Fourth Edition With HKPropel Access, takes a practical approach for teaching students how to become strong leaders and managers in the world of sport. Organized around the central management functions of planning, organizing, leading, and controlling, and addressing the Commission on Sport Management Accreditation (COSMA) Common Professional Component topics and North American Society for Sport Management (NASSM) guidelines, the fourth edition has been extensively updated with hundreds of new references and sport examples. The text employs a three-pronged approach for teaching management theory, putting theories into practice, and developing students' management skills. Timely discussions and case studies address the impacts of COVID-19; Black Lives Matter initiatives; name, image, and likeness rules; women in executive positions; corporate social responsibility; data analytics; and more. While other texts focus on learning about sport management, Applied Sport Management Skills enables students to apply the principles while developing the skills to become effective sport managers. Interactive online learning tools available through HKPropel complement activities found in each chapter: Flash-card activities help students learn key terms. Self-assessments, which ask students to identify their strengths and weaknesses and plan to improve shortcomings, are now assignable, trackable, and automatically scored. Applying the Concepts quizzes, which challenge students to identify management concepts illustrated in various situations, are now trackable and automatically scored. Time-Out features, in which students apply management concepts to their personal sport and work experiences, are now assignable instructor-scored assessments. Case studies are now supplemented by 10-question automatically scored quizzes and include three open-ended discussion questions. Additional assignments available in downloadable

This text studies how organizations, when solving a specific problem, identify a set of potential solutions called Search Space. By drawing from evolutionary theory and related literatures on strategic change, scholars have demonstrated differences in search mechanisms that explain how organizations choose solutions. However, we still face unanswered questions in understanding how organizations decide where to search, including how organizations identify a set of potential solutions or Search Space. This book defines the concept of Search Space and identifies three factors uncertainty, prior top managerial attention, and prior experience that drive differences in Search Space. Additionally, this dissertation starts to disentangle why some firms' top managers are predisposed to paying more attention to new strategic areas by investigating the relationship between uncertainty and top managerial attention.

"Rebellion" is the multi-threaded, fascinating story about a rebellion that changed Poland. It begins when the authorities promised a better life after the bloody suppression of the strike in December 1970. The availability of goods increased, the world seemed closer. Yet rebellion had come.

This book provides the reader for the first time with the full story of the Great Strike of August 1980, the center of which was located in the Gdańsk Shipyard. The same slogans and demands, however, were made by protesters in Szczecin, Elbląg, Kraków, Łódź, Wrocław, Silesia and dozens of other places across Poland. The eyes of the world were on Gdańsk, and the agreement signed in the light of the cameras, in which the communist authorities were forced to make concessions, was celebrated by Poles all over the country. From the very beginning, the strike demands were not only a fight for bread, but also a fight for the dignity of the worker. However, the most important thing was the creation of a new community. The authorities had to either yield or call for help from foreign troops and chose a compromise. Many days of negotiations with the strikers resulted in an agreement that started a new chapter in Polish history.

While the stock image of the anarchist as a masked bomber or brick thrower prevails in the public eye, a more representative figure should be a printer at a printing press. In *Letterpress Revolution*, Kathy E. Ferguson explores the importance of printers, whose materials galvanized anarchist movements across the United States and Great Britain from the late nineteenth century to the 1940s. Ferguson shows how printers—whether working at presses in homes, offices, or community centers—arranged text, ink, images, graphic markers, and blank space within the architecture of the page. Printers' extensive correspondence with fellow anarchists and the radical ideas they published created dynamic and entangled networks that brought the decentralized anarchist movements together. Printers and presses did more than report on the movement; they were constitutive of it, and their vitality in anarchist communities helps explain anarchism's remarkable persistence in the face of continuous harassment, arrest, assault, deportation, and exile. By inquiring into the political, material, and aesthetic practices of anarchist print culture, Ferguson points to possible methods for cultivating contemporary political resistance.

The definitive guide to the game-theoretic and probabilistic underpinning for Bitcoin's security model. The book begins with an overview of probability and game theory. Nakamoto Consensus is discussed in both practical and theoretical terms. This volume: Describes attacks and exploits with mathematical justifications, including selfish mining. Identifies common assumptions such as the Market Fragility Hypothesis, establishing a framework for analyzing incentives to attack. Outlines the block reward schedule and economics of ASIC mining. Discusses how adoption by institutions would fundamentally change the security model. Analyzes incentives for double-spend and sabotage attacks via stock-flow models. Overviews coalitional game theory with applications to majority takeover attacks. Presents Nash bargaining with application to unregulated environments. This book is intended for students or researchers wanting to engage in a serious conversation about the future viability of Bitcoin as a decentralized, censorship-resistant, peer-to-peer electronic cash system.

Roman Dmowski (1864–1939) gilt bis heute als der bedeutendste Theoretiker und „Vater“ des polnischen Nationalismus. Mit dem Regierungsantritt der Partei „Recht und Gerechtigkeit“ (PiS) ist sein Denken wieder ins Zentrum von Kontroversen gerückt. In diesem Band werden Dmowskis wichtigste Werke zum ersten Mal in deutscher Übersetzung präsentiert und kommentiert.

Die von Dmowski 1897 begründete „Nationaldemokratische Partei“ hatte großen Einfluss auf die Gestaltung der politischen Landschaft Polens nach 1918. Ihr Gedankengut wirkte auch nach dem Zweiten Weltkrieg weiter und hat seit 1989 einen neuen Aufschwung erfahren, der sich in den letzten Jahren verstärkt hat. Die Textauswahl umfasst u.a. Dmowskis ideologisches Hauptwerk, die „Gedanken eines modernen Polen“ von 1903 sowie „Deutschland, Russland und die polnische Frage“ von 1908, in dem Dmowski seine geopolitische Konzeption entfaltete. Von den Schriften aus der Zeit nach dem Ende des 1. Weltkriegs verdeutlicht der Text „Kirche, Nation und Staat“ sein Verhältnis zur Rolle der katholischen Kirche in der polnischen Nation. Erhellend für Dmowskis Blick auf Deutschland, aber auch seinen Antisemitismus, ist der Essay „Der Hitlerismus als nationale Bewegung“ (1932). Die Quellentexte werden mit Erläuterungen versehen und dem Band wird eine ausführliche Einleitung vorangestellt.

In the 1980's sonochemistry was considered to be a rather restricted branch of chemistry involving the ways in which ultrasound could improve synthetic procedures, predominantly in heterogeneous systems and particularly for organometallic reactions. Within a few years the subject began to expand into other disciplines including food technology, environmental protection and the extraction of natural materials. Scientific interest grew and led to the formation of the European Society of Sonochemistry in 1990 and the launch of a new journal Ultrasonics Sonochemistry in 1994. The subject continues to develop as an exciting and multi-disciplinary science with the participation of not only chemists but also physicists, engineers and biologists. The resulting cross-fertilisation of ideas has led to the rapid growth of interdisciplinary research and provided an ideal way for young researchers to expand their knowledge and appreciation of the ways in which different sciences can interact. It expands scientific knowledge through an opening of the closed doors that sometimes restrict the more specialist sciences. The journey of exploration in sonochemistry and its expansion into new fields of science and engineering is recounted in "Sonochemistry Evolution and Expansion" written by two pioneers in the field. It is unlike other texts about sonochemistry in that it follows the chronological developments in several very different applications of sonochemistry through the research experiences of the two authors Tim Mason and Mircea Vinatoru. Designed for chemists and chemical engineers Written by two experts and practitioners in the subject Volume 1 covers the historical background and evolution of sonochemistry Volume 2 explains the wider applications and expansion of the subject VOLUME 2 Applications and Developments Volume 2 contains six chapters which detail the developments of sonochemistry in fields which continue to attract considerable research and development interest from academia and industry. The topics range from the important developments in chemical synthesis through food technology and materials processing to therapeutic ultrasound. The authors have

Academic Women: Voicing Narratives of Gendered Experiences

In this collection, both individually and collectively, the authors explore the gendering of women's experiences in academia through the lens of narratives of lived experience. This is a cogent theme throughout the book, reflecting on women's experiences as intersectional—always raced, classed, gendered, nuanced and complex. Jointly, the chapters provide important insights into individual and collective contemporary women's experiences in academia from international perspectives, such as gender equity, barriers to success, and achievement. This comprehensive volume provides a reference point for all women and their colleagues working in universities and colleges across the world.

The North Caucasus, specifically Chechnya and Ingushetia, is a region that has experienced some of the deadliest and most protracted conflicts in Europe. By examining the relationship between state and society, this book considers how state-building has unfolded in a region with highly complex social structures, a history of colonialism, Soviet authoritarianism, and later post-Soviet wars and trauma.

Focusing on a systematic analysis of subnational state-building in post-Soviet Chechnya and Ingushetia, and the role of teips (clans) in this process, this study responds to the widely accepted academic claim that governance and ethnic consolidation in the North Caucasus is shaped by the politics of teips. Through socio-anthropological analysis of the clans and how they function towards political systems, Sokirianskaia shows how the teips lost their organizational structure and roles, becoming incapable of mobilizing for political action. While teip symbolism has remained politically relevant, and the bonds of kinship are highly important, they do not form the basis of politics and subnational statebuilding in Chechnya and Ingushetia. Consequently, subnational authoritarianism is not the result of the pre-existing social composition of the society, but a reflection of the rules of the game imposed by Moscow and political choices of the Kremlin-installed local elites.

The fallout from Brexit and Covid-19, ongoing political turmoil, economic decline and calls for a second Scottish independence referendum make for deeply uncertain times in contemporary Britain. What will the country look like in five years from now? Will it even exist in its present form?

Introducing you to all aspects of British history, geography, society, politics, economy and culture, this book guides you through the country's enduring features and recent trends:

- Growing racial, religious, national and cultural diversity
- Demographic shifts, including the move from a welfare state to a stakeholder society
- The altered balance of power among government institutions, as the UK adapts to life outside the EU
- Shifts in economic policy, following the impact of Brexit, Covid-19 and the war in Ukraine
- Changing voter attitudes, with questions raised about the balance between the major political parties
- The impact of social media and alternative communications channels on media, culture and politics.

With key data, further reading suggestions and case studies on topics such as attitudes towards the monarchy, regional inequalities and national cuisine, Contemporary Britain is the ideal introduction for students and interested general readers alike.

What is eye-tracking? Why is it important for linguistics? How can I use it in my own research project?

Answering these questions and more, this book guides you through one of the most exciting and innovative research methods in the field of linguistics. Divided into three parts, it provides a historical introduction, a foundational overview to the neurology and physiology of the eye and the common measurements and tools used in eye-tracking, a guide to the applications of eye-tracking most pertinent to linguists (reading, the visual-world paradigm, social eye tracking, and classroom applications), and a step-by-step process to plan, execute, analyze and report your research project in eye-tracking. The book covers topics such as reading, lexical and syntactic processing, mind wandering, second language acquisition, and AAC devices, and includes statistical tools and how to write up results. Each chapter also includes self-study questions and a range of applied case studies.

Supported by a glossary of key terms and a companion website featuring additional tools and resources for students and teachers, Eye-Tracking in Linguistics is the only book you need to provide a solid foundation for your own research project.

In turbulent global times, your study of this subject is increasingly necessary and urgent.

Featuring a new chapter on critical theories, and revised to take a less Eurocentric approach to concepts and case studies, this new edition allows you to tackle global politics' important concepts, debates and problems:

- How can theories help us to understand the politics of a global pandemic?
- Do we live in a 'post-truth' world of 'fake news' and disinformation?
- Does international aid work?
- Does the United States remain a global hegemon?
- What is the Anthropocene and how does it shape global politics?
- Are global politics constrained by a 'North-South' divide?
- What are the possible futures of global politics – and the politics of outer space?

Delving into topics as diverse as anarchy, intersectionality, Confucianism, and neoconservatism, boxed features give you confidence in political analysis:

Law and Islamic Dress: Rights and Fascism in Europe

Kimberley Brayson

ISBN: 9781509910496	Form: Hardback	Pub date: 2023-03-09
Edition: 1	Price: GBP 60.00	Pages: 208
Publisher: Bloomsbury Academic (JL)	Readership: College/higher education	Language: Eng
Discipline: Social Science	Category: Law & Criminology	Subject: Gender & the law, Human rights & civil liberties law, Jurispru

This book conceptualises European Court of Human Rights' judgments on Islamic dress as manifestations of the fascist impulse in modern human rights law. The author argues that human rights are thus not an antidote to fascism but are constituted through a fascist inflection and implicated in circulating fascism in the everyday. The inability of human rights to say 'no' to laws regulating and criminalising Islamic dress in Europe engenders an institutional Islamophobia in the law and Islamic dress debate in Europe.

The author interrogates the historical emergence of human rights, through a methodology of interdisciplinary, theoretical oscillations between feminism, decolonial, phenomenological and neo-Marxist thought to establish the rights/fascism dialectic. She argues that beyond exclusion and erasure the ownership of rights discourse enables the exploitation of racialised and gendered bodies for the maintenance of material and epistemological privilege with a white, Christian, male norm. It is this moment of ownership, where rights are both propertied and property, that constitutes the rights/fascism dialectic. The author goes on to argue that the rights/fascism dialectic operates at the heart of the Islamic dress debate in Europe to create the impossibility and instrumentalisation of Muslim women's bodies in European public space.

The book challenges shifting legal justifications by exposing the functioning of capital, colonialism, patriarchy and power at the European Court of Human Rights in key cases such as Sahin v Turkey and SAS v France. Theoretical insights of the rights/fascism dialectic are applied to the law and Islamic dress debate in the multicultural UK, assimilationist France and at the ECtHR. The conclusion is that the Islamic dress debate in Europe manifests the gender and racial differentiation and instrumentalisation that is essential to the maintenance of human rights.

Chanel suits, Louis Vuitton bags and Omega watches are now objects that embody a globalized material culture. Over the past 30 years, the luxury goods industry has undergone a tremendous expansion around the world. However, it remains largely dominated by European companies, ranging from diversified conglomerates such as LVMH and Richemont to independent companies such as the Italian fashion houses Armani and Ermenegildo Zegna, and industrial groups like Swatch and L'Oréal or new start-ups such as Richard Mille. How and why did these companies succeed? How did they manage to transform a sector previously dominated by small family firms into a global big business?

Selling Europe to the World presents the development of the global luxury goods industry from the 1980s to the present day. It highlights the strategies implemented by a new generation of entrepreneurs and explains, beyond the glamorous image conveyed by luxury brands, the sources of success of these firms. An essential book for understanding the success of the contemporary luxury industry.

Soviet Critical Design: Senezh Studio and the Communist Surround

Soviet Critical Design is the first book to explore the socialist design practice of ‘artistic projecteering’, which was developed by the USSR’s Senezh Experimental Studio in the 1960s.

Tom Cubbin examines the studio as a site for the development of the design discipline in the optimistic environment of the 1960s Soviet Thaw. He also explores how designers adapted to the fast-changing Soviet Union of the 1970s and 1980s, considering their approach to critical projects highlighting the Soviet state’s treatment of citizens, urban heritage and public spaces.

Drawing on previously unpublished visual material from private archives and also extensive interviews, this book presents a new history of the late socialist period in the USSR, which gives insight into the creative strategies of designers who engaged their practice as a contribution to broader discussions on alternative models for socialist existence. Cubbin shows how artistic projecteering must be read as a utopian activity which privileged the political and ideological over the functional.

The Global Business Environment: Sustainability in the Balance

This text challenges students to think critically about global issues that affect the business environment and provides them with a wealth of pedagogical features that help cement learning. Its coverage includes the economic, political, social, legal, cultural, technological and financial environments.

The book is truly global in coverage, with case studies and examples from all over the world, including Afghanistan, China, Sweden and Thailand. It also has a strong focus on ethics, responsibilities and sustainability and what this means for business organizations. Janet Morrison's writing style makes difficult concepts easy to understand and its clarity makes it suitable for students with English as a second language.

New to this edition:

- The theme of uncertainty in global contexts, examining how best to assess and confront the challenges of uncertainties and risks in the differing dimensions of the business environment
- A chapter on the worldwide pandemic and the global business environment
- Increased coverage of FDI, industrial policy and global communication
- New coverage relating to race relations and decolonising the curriculum

Writing for Science Students

ISBN: 9781350932678	Form: Paperback / softback	Pub date: 2023-03-09
Edition: 2	Price: GBP 16.99	Pages: 208
Publisher: Bloomsbury Academic (JL)	Readership: College/higher education	Language: Eng
Discipline: Social Science	Category: Education	Subject: Study & learning skills: general, Writing & editing guides

Catering to the specific needs of science students, this award-winning guide equips students of all scientific disciplines with the skills they need to communicate effectively in written assignments.

The book guides students through each of the key stages involved in producing a piece of scientific writing. It begins by developing students' understanding of the different types of scientific writing, including lab reports, essays and abstracts. Students are then taken through the writing process, from the initial stages of interpreting the question and conducting research through to writing a draft and responding to feedback.

The second edition includes new material on criticality in scientific communication and the difference between descriptive and analytic writing. There is also a new section on building arguments using several sources, and new and extended examples of writing that will help students digest the material.

This is an essential resource for all science students who are required to produce lab reports, extended essays, dissertations and other written assignments as part of their course. It is also ideal for international students who are new to academic study in the UK.

«This fantastic book investigates the proliferation, power and changing nature of online feminist activism. The book critically focuses on the challenges and risks of online feminist activism, as well as the capacity of activist campaigns to achieve real, transformative change. Casey and Watson argue that although feminists should harness the power of hashtag and celebrity feminism, there are tensions, inequalities and power imbalances within feminism which must be navigated.

This book is a must-read, especially for activists, academics, victim-survivors and policymakers. It makes an important contribution to contemporary debates about the role of feminist digital activism across three key areas: raising public awareness of gender-based violence, contributing to cultural change, including changing norms, attitudes and behaviours, and shaping understandings of how gender, race, sexuality and other markers of difference intersect to shape experience. The book is a timely reminder that feminist activism is an important piece of the puzzle to preventing gender-based violence.»(Professor Nicola Henry, RMIT University)

«Hashtag Feminisms is powerful. It is potent. It is engaging. This book offers momentum and transformation. It provides a pathway to our future, through courage, reflection, kindness and compassion.»(Professor Tara Brabazon, Professor of Cultural Studies (Flinders University) / Professor of Higher Education (Massey University))

Broad-scale feminist consciousness continues to gain ground globally, as witnessed by the Women's March, #MeToo, and #EnoughIsEnough in Australia. Aided by hashtag activism and media feminists, feminist campaigns have highlighted the need for change in cultural attitudes to issues such as gender-based violence. This book focuses on feminist campaigning in the Australian context over the last decade, contending the increased velocity of feminist discourse in the Australian mediascape represents a critical opportunity for larger scale, feminist-led mass

MANAGING NORTHERN EUROPE'S FORESTS

Histories from the Age of Improvement
to the Age of Ecology

Edited by K. Jan Oosthoek and Richard Hölzl

Northern Europe was, by many accounts, the birthplace of much of modern forestry practice, and for hundreds of years the region's woodlands have played an outside role in international relations, economic growth, and the development of national identity. Across eleven chapters, the contributors to this volume survey the histories of state forestry policy in Scandinavia, the Low Countries, Germany, Poland, and Great Britain from the early modern period to the present. Each explores the complex interrelationships of state-building, resource management, knowledge transfer, and trade over a period characterized by ongoing modernization and evolving environmental awareness.

The burgeoning film industry in the Weimar Republic was, among other things, a major site of German-Jewish experience, one that provided a sphere for Jewish “outsiders” to shape mainstream culture. The chapters collected in this volume deploy new historical, theoretical, and methodological approaches to understanding the significant involvement of German Jews in Weimar cinema. Reflecting upon different conceptions of Jewishness – as religion, ethnicity, social role, cultural code, or text – these studies offer a wide-ranging exploration of an often overlooked aspect of German film history.

Whilst the COVID-19 pandemic affected all parts of the country, it did not do so equally. Northern England was hit the hardest, exposing more than ever the extent of regional inequalities in health and wealth.

Using original data analysis from a wide range of sources, this book demonstrates how COVID-19 has impacted the country unequally in terms of mortality, health care, mental health, and the economy.

The book provides a striking empirical overview of the impact of the pandemic on regional inequalities and explores why the North fared worse.

It sets out what needs to be learnt from the pandemic to prevent regional inequality growing and to reduce inequalities in health and wealth in the future.

From the Alcatraz East Crime Museum and Jack the Ripper guided tours to the Phnom Penh killing fields, 'dark tourism' is now a multi-million-pound global industry. Even in the most pleasant tourist destinations, underlying harms are constantly perpetuated, affecting both consumers and those who work or live around such tourist hotspots. Highlighting 50 travel destinations across six continents, expert criminologists, psychologists and historians explore the past and contemporary issues which we often disregard during our everyday leisure.

This captivating book is the 'go-to' guide for anyone interested in crime and deviance-related tourism. Accessible and digestible, it exposes a worrying trend in contemporary consumer culture, in which many of us partake.

This book looks at the changes that have taken place in the wake of the COVID-19 pandemic, following the lockdown of societies and imposition of border controls in an attempt to limit the spread of the virus.

Using empirical evidence from Portugal, a geopolitically important point of intersection within Europe and between Global South and Global North, the book examines consequences of the apparent end of mobility expansionism, developing a refreshing theoretical concept of 'immobility turn.'

Focusing on the tourist industry, universities hosting international students and migration agencies, the book offers invaluable insights about how the pandemic affected institutions and individuals' lives, informing policy-making processes on a global level.

Who We Are Now: Stories of What Americans Lost and Found During the COVID-19 Pandemic

Michelle Fishburne did the unthinkable during the early days of the COVID-19 pandemic: she motor-homed 12,000 miles all over the United States and sat down with hundreds of people face to face. People shared what their lives were like, what made them struggle, and what surprised them. The personal histories in this book show a diversity of American lives, from the young college student who finds unexpected fame on TikTok to a special-education teacher sharing the challenges of remote learning. Everyone's story is different. Some, like Fishburne, lost their jobs. Others lost family, friends, and even their own health and well-being. And yet among the difficulties, many found something that had eluded them before the pandemic. These testimonies offer a glimpse into what people across America lost and found during the pandemic's critical first year. Fishburne lets us hear people's stories as if we were there, in real time, at the beginning of COVID-19, when employment was uncertain, schools were online, and American life more unpredictable than ever before.

A foundational introduction to the field with the latest in geographic technologies.

Introduction to Geospatial Technologies demonstrates the wide range of geographic technologies available to and used by geographers today. Each chapter contains an introduction to the key concepts and a lab activity, so that in addition to gaining a basic foundation of knowledge, students also obtain hands-on experience with the relevant software.

- Each chapter covers one aspect of geospatial technology with an accompanying Geospatial Lab Application to help students work directly with the chapter's concepts.
- Hands-On Applications utilize free Internet resources to help students further explore the world of geospatial technologies including interactive map-making and real-time satellite tracking.
- Presents questions to consider regarding potential societal, privacy, design, or ethical issues posed by geospatial technologies encouraging the students to think critically about geospatial technology.
- Promotes representative apps related to the chapter's content which students may wish to investigate further.

Every decision is an economic decision.

Principles of Microeconomics 2e by Betsey Stevenson (University of Michigan), and Justin Wolfers (University of Michigan) emphasises that every decision is an economic decision. The authors' focus on useful economics uses compelling explanations and real-life examples to help students develop and apply economic intuition to their everyday decisions. They provide a thoroughly fresh take on a wide range of foundational topics in an engaging presentation that has drawn enthusiastic feedback from both instructors and students.

- An intuitive decision-making framework based on four key principles is referenced throughout the text and guides students to make better choices in all aspects of their lives.
- With an unparalleled presentation of the basics, there are dedicated, full chapters on supply, demand, and equilibrium that walk students patiently through these topics. This aligns with how many instructors already teach – by working through these foundational concepts over several lectures.
- A modern approach to Microeconomics integrates the current economic insights into the principles curriculum, with emphasis on empirical data and behavioral economics, labor and personnel economics, industrial organization, strategic decision making, and information asymmetries.

Contemporary and compelling: connecting developmental psychology to students own lives

Kathleen Berger's signature narrative voice, wide-ranging cultural perspective, and focus on universal themes captivates students from the outset. Including exceptionally fast moving areas such as brain development and psychopathology (incorporating DSM-5 updates) this edition remains relevant. This engaging title helps students to grasp the important theoretical and scientific work driving the field of developmental psychology today. This title concentrates on revealing the connections between the study of development across all stages of life and the lives that students actually live.

- Visual storytelling is used to explain important concepts in life-span development around the globe, making this a diverse title suitable for various student learning styles.
- Contrasting Perspectives asks students to look at both sides of a controversial issue (from pre-natal sex selection to e-cigarettes), encouraging critical thinking, including examining ones own biases.
- Includes contemporary neuroscience research, broadening students' perspective on psychology and its potential applications and remaining relevant to today's students.
- Berger highlights cultural differences and universals and their impact on the values and customs that shape individual development, embedding diversity and inclusion throughout.

The Heresies of Jan Patočka: Phenomenology, History, and Politics

A nuanced reflection on the meaning and resonance of Patočka’s philosophy Foregrounding the turbulent political and intellectual scene in Czechoslovakia following the Prague Spring in 1968, James Dodd explores the unity of philosophy, history, and politics in Jan Patočka’s life and legacy. James Dodd presents Patočka as an essential philosopher of modern concepts—such as freedom, subjectivity, and history—and also as an interpreter of prominent thinkers such as Husserl and Heidegger. Dodd outlines the phenomenology that Patočka, as a late pupil of Husserl and Heidegger, crafted in response to the classical model before turning to his philosophy of history, which was oriented around the problem of Europe and the care for the soul. Finally, Dodd examines Patočka’s role as a dissident intellectual and one of the principal voices of the Charter 77 human rights movement before his death in March 1977. By situating Patočka’s thought in relation to classical phenomenology and to the political and historical conditions of Central Europe, Dodd illuminates the enduring impact of this key thinker of the twentieth century.

As the COVID-19 pandemic has unfolded, stark social inequalities have increasingly been revealed and, in many cases, exacerbated by the global health crisis.

This book explores these inequalities, identifying three thematic strands: power and governance, gender and marginalized communities. By examining these three themes in relation to the effects of the pandemic, the book uncovers how unequal the pandemic truly is. It brings together invaluable insights from a range of international scholars across multiple disciplines to critically analyse how these inequalities have played out in the context of COVID-19 as a first step towards achieving social justice.

Multidisciplinary Applications of Computer-Mediated Communication

Discipline: Hard Science	Category: Computing & IT	Subject: Computer networking & communications, Telephone technology, WA

Computer-mediated communication (CMC) refers to human communication mediated by electronic devices. CMC can be broken down into two forms: synchronous and asynchronous. Synchronous CMC provides opportunities for direct communication between involved parties. In contrast, asynchronous CMC refers to communication that takes place when the message sender does not receive an immediate response from the recipient. Further study is required to fully understand the uses and applications of this communication. Multidisciplinary Applications of Computer-Mediated Communication considers the future use of CMC and recent applications of CMC in different contexts in the world with implications for further development. Covering key topics such as learning environments, business communication, and social media, this reference work is ideal for industry professionals, researchers, scholars, academicians, practitioners, instructors, and students.

This book explores civil–military relations in Asia. With chapters on individual countries in the region, it provides a comprehensive account of the range of contemporary Asian practices under conditions of abridged democracy, soft authoritarianism or complete totalitarianism. Through its analysis, the book argues that civil–military relations in Asia ought to be examined under the concept of ‘Asian military evolutions’. It demonstrates that while Asian militaries have tried to incorporate standard, Western-derived frameworks of civil–military relations, it has been necessary to adapt such frameworks to suit local circumstances. The book reveals how this has in turn led to creative fusions and novel changes in making civil–military relations an asset to furthering national security objectives.

This volume, the first of three in the series focusing on the persecution and murder of the Jews in occupied Poland, documents the developments from the attack on Poland in September 1939 up to July 1941. It covers the territories of western and northern Poland annexed to the Reich as well as the General Government. With the attack on Poland, around two million Polish Jews came under German rule. Jews were immediately subjected to stigmatization and humiliation, exposed to arbitrary acts of violence, deprived of their livelihoods, subjected to forced labour and forcibly displaced. In July 1940, a report by representatives of Polish Jews on the situation in the annexed territories of Poland sent to the US embassy in Berlin described a ‘downcast, stigmatized Jewish population’, terrorized and powerless in face of displacement, expulsions and the increasing incarceration of the Jewish population in ghettos, and it predicted that ‘the process of destruction is not yet complete’. The volume documents the drive by the occupiers systematically to confiscate the property of the Polish Jews, and the different, often chaotic and conflicting strategies for displacing Jews in the annexed territories and in the General Government. The volume shows a range of reactions by the non-Jewish population of Poland to the escalating persecution of the Polish Jews. It also shows the efforts by Jewish organizations to publicize their plight abroad, to withstand the onslaught on their communities and to manage daily life in the increasingly desperate conditions of the ghettos. Many students learn to analyze data using commercial packages, even though there is an open-source software with cutting-edge possibilities: R, a programming language with countless cool features for applied empirical research. Practice R introduces R to social science students, inspiring them to consider R as an excellent choice. In a non-technical pragmatic way, this book covers all typical steps of applied empirical research. Learn how to prepare, analyze, and visualize data in R. Discover how to collect data, generate reports, or automate error-prone tasks. The book is accompanied by an R package. This provides further learning materials that include interactive tutorials, challenging you with typical problems of applied research. This way, you can immediately practice the knowledge you have learned. The package also includes the source code of each chapter and templates that help to create reports. Practice R has social science students in mind, nonetheless a broader audience may use Practice R to become a proficient R user.

A History of Education in Modern Russia is the first book to trace the significance of education in Russia from Peter the Great's reign all the way through to Vladimir Putin and the present day.

Individual chapters open with an overview of the political, social, diplomatic and cultural environment of the period in order to orient the reader. Dowler then goes on to analyse the aims of education initiatives in each era before considering the ways in which Russians experienced education, both as students and as teachers. Each chapter concludes with an assessment of the outcomes and consequences of education policies in the period, both the successes and failures as well as the impact of education on the cultural, social, economic and ultimately political environments. The chronologically arranged book also traces and then summarises underlying key themes like the tension between an open system of education and an estate-based system; the push and pull between utility and the broader goal of human development; and the effects of centralized, authoritarian control that for much of the period limited local initiative and starved the regions of adequate resources.

France/Kafka: An Author in Theory

While his memory languished under Nazi censorship, Franz Kafka covertly circulated through occupied France and soon emerged as a cultural icon, read by the most influential intellectuals of the time as a prophet of the rampant bureaucracy, totalitarian oppression, and absurdity that branded the twentieth century. In tracing the history of Kafka's reception in postwar France, John T. Hamilton explores how the work of a German-Jewish writer from Prague became a modern classic capable of addressing universal themes of the human condition.

Hamilton also considers how Kafka's unique literary corpus came to stimulate reflection in diverse movements, critical approaches, and philosophical schools, from surrealism and existentialism through psychoanalysis, phenomenology, and structuralism to Marxism, deconstruction, and feminism. The story of Kafka's afterlife in Paris thus furnishes a key chapter in the unfolding of French theory, which continues to guide how we read literature and understand its relationship to the world.

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things.

Grave takes a ground-level view of how burial sites have transformed over time and how they continue to change. As a cemetery tour guide, Allison C. Meier has spent more time walking among tombstones than most. Even for her, the grave has largely been invisible, an out of the way and unobtrusive marker of death. However, graves turn out to be not always so subtle, reverent, or permanent.

While the indigent and unidentified have frequently been interred in mass graves, a fate brought into the public eye during the COVID-19 pandemic, the practice today is not unlike burials in the potter's fields of the colonial era. Burial is not the only option, of course, and Meier analyzes the rise of cremation, green burial, and new practices like human composting, investigating what is next for the grave and how existing spaces of death can be returned to community life.

Object Lessons is published in partnership with an essay series in The Atlantic.

HUMAN RIGHTS RESPONSIBILITIES IN THE DIGITAL AGE

This book examines the tangled responsibilities of states, companies, and individuals surrounding human rights in the digital age. Digital technologies have a huge impact – for better and worse – on human lives; while they can clearly enhance some human rights, they also facilitate a wide range of violations.

States are expected to implement efficient measures against powerful private companies, but, at the same time, they are drawn to technologies that extend their own control over citizens. Tech companies are increasingly asked to prevent violations committed online by their users, yet many of their business models depend on the accumulation and exploitation of users' personal data. While civil society has a crucial part to play in upholding human rights, it is also the case that individuals harm other individuals online. All three stakeholders need to ensure that technology does not provoke the disintegration of human rights.

Bringing together experts from a range of disciplines, including law, international relations, and journalism, this book provides a detailed analysis of the impact of digital technologies on human rights, which will be of interest to academics, research students and professionals concerned by this issue.

Knowing What the Law Is

Legal Theory in a New Key

Alexander Somek

This book provides a selective and somewhat cheeky account of prominent positions in legal theory, such as American legal realism, modern legal positivism, sociological systems theory, institutionalism and critical legal studies. It presents a relational approach to law and a new perspective on legal sources.

The book explores topics of legal theory in a playful manner. It is written and composed in a way that refutes the widespread prejudice that legal theory is a dreary subject, with a cast of characters that occasionally interact in order to illustrate the claims of the book.

Legal experts claim to know what the law is. Legal theory—or jurisprudence—explores whether such claims are warranted. The discipline first emerged at the turn of the 20th century, when the self-confidence of both legal scholarship and judicial craftsmanship became severely shattered, but the crisis continues to this day.

How does religion maintain or challenge discourses on national identity? What are the roles that religion plays on all sides – from Islamophobia of the radical right to the Christian alliances on both sides of the Atlantic, to the Islamic beliefs and practices of European citizens as well as migrant communities – in the constitution of Fortress Europe? Are there any alliances shaping between belief and unbelief on either side of the battle for the future of Europe?

These questions and more motivate the chapters in this timely interdisciplinary collection, with contributions focusing on diverse contexts throughout Europe involving a broad range of religious identifications and actors.

Silent Films/Loud Music discusses contemporary scores for silent film as a rich vehicle for experimentation in the relationship between music, image, and narrative. Johnston offers an overview of the early history of music for silent film paired with his own first-hand view of the craft of creating new original scores for historical silent films: a unique form crossing musical boundaries of classical, jazz, rock, electronic, and folk. As the first book completely devoted to the study of contemporary scores for silent film, it tells the story of the historical and creative evolution of this art form and features an extended discussion and analysis of some of the most creative works of contemporary silent film scoring.

Johnston draws upon his own career in both contemporary film music (working with directors Paul Mazursky, Henry Bean, Philip Haas and Doris Dörrie, among others) and in creating new scores for silent films by Browning, Méliès, Kinugasa, Murnau & Reiniger. Through this book, Johnston presents a discussion of music for silent films that contradicts long-held assumptions about what silent film music is and must be, with thought-provoking implications for both historical and contemporary film music.

The European Union and International Investment Law: The Two Dimensions of an Uneasy Relationship

This book explores the interaction between the EU and international investment law, both at the internal level, namely within the EU internal market, and at the external level, i.e. in the context of its relations with third States.

The joint treatment of these dimensions reveals that the EU has assumed an ostensibly ambivalent attitude towards international investment law. At the internal level, it has consistently asserted that intra-EU international investment agreements (IIAs) are not compatible with EU law and advocated their termination. At the external level, by contrast, it has eagerly deployed IIAs to develop its post-Lisbon international investment policy.

The book finds that beneath this apparent ambivalence towards international investment law ultimately lies the EU's attempt to impose, both internally and externally, its own original model of regulation of cross-border investment. It then argues that the EU adopted this approach with a view to supporting its internal market, enhancing its external influence, and, ultimately, pursuing long-term 'federal aspirations'. Finally, the book identifies the legal and political obstacles that have curtailed the EU's efforts at both the internal and the external level.

All Kinds of Scary: Diversity in Contemporary Horror

Horror fictions display a wealth of potential, and appeal to a variety of diverse audiences. However, the trope of "the black man always dies first" still haunts the genre. This research focuses on what the author argues is the latest cycle of diversity in horror fictions, starting with the release of *Get Out* in 2017, which inspired a new speculative turn for representation in horror fiction. Using various critical frameworks like feminism and colonialism, this work also assesses diversity gaps in horror fictions, with an emphasis on marketing and storytelling methodology. By reviewing the canon and definitions of horror, historical significance may point to influences for present and future implications of diversity, which has cyclically manifested in horror fictions throughout history. This book studies horror fictions from literature, film and television while acknowledging that each of the formats are distinct artforms that complement each other. The author compares diverse representation in novels like *The Castle of Otranto*, *Frankenstein*, *Fledgling*, *Broken Monsters* and *Mexican Gothic*. Horror films like *Bride of Frankenstein*, *It Comes at Night*, *Us* and *Get Out* are also examined. Lastly, the author emphasizes the diverse horror fictions in television, like *The Exorcist*, *Fear the Walking Dead*, *The Twilight Zone* and *Castle Rock*.

Political hackers, like the Anonymous collective, have demonstrated their willingness to use political violence to further their agendas. However, many of their causes are intuitively good things to fight for.

This book argues that when the state fails to protect people, hackers can intervene. It highlights the space for hackers to operate as legitimate actors; details what actions are justified towards what end; outlines mechanisms to aid ethically justified decisions; and directs the political community on how to react.

Applying this framework to hacking operations including the Arab Spring, police brutality in the USA, and Nigerian and Ugandan homophobic legislation, it offers a unique contribution to hacking as a contemporary political activity.

This investigation of Polish, Jewish, and German sources demonstrates the roles of music in occupied Poland. Its former citizens had their access to music controlled by the Nazi Ministry of Propaganda. It was rationed as other goods, depending on racial (i.e. also legal) status. Official music performances served as a propagandistic tool to further divide the Nazi-segregated population. Music played clandestinely embodied resistance. It restored the sense of community and helped save musicians persecuted as Jews, like Władysław Szpilman. The documents analyzed in the monograph confirm the dehumanization of prospective victims, mixed with a narcissistic self-righteous view of Nazi songs and propaganda ultimately led to the organized presence of music in the Holocaust sites.

Written by one of the country's most renowned rulers, *A Description of Moldavia* provides unique insight into the geography, history, economy, ethnography, culture, and traditions of the principality. Born to a noble family, the author, Dimitrie Cantemir, ruled as Prince of Moldavia on two occasions (March-April 1693 and 1710-1711). He was a famed statesman, philosopher, and scholar. Cantemir wrote his *Description of Moldavia* (*Descriptio Moldaviae*) in 1716 at the request of the Royal Academy in Berlin, of which he was a member. Cantemir's manuscript included a map (reproduced in the present edition), the first real map of the country, containing geographical detail. The book provides a wealth of information about the country's natural resources, political organization, customs and traditions, history, religion, and language. This deluxe edition of this classic work marks the first time *A Description of Moldavia* has appeared in the English language. An introduction and notes by Dr. A.K. Brackob, a noted specialist on Romanian and East European history, enhance this valuable historical resource.

The open access publication of this book has been published with the support of the Swiss National Science Foundation. From pilgrimage sites in the far west of Europe to the Persian court; from mystic visions to a gruesome contemporary “dance”; from a mundane poem on wine to staggering religious art: thus far in space and time extends the world of the Armenians. A glimpse of the vast and still largely unexplored threads that connect it to the wider world is offered by the papers assembled here in homage to one of the most versatile contemporary armenologists, Theo Maarten van Lint. This collection offers original insights through a multifaceted lens, showing how much Armenology can offer to Art History, History, Linguistics, Philology, Literature, and Religious Studies. Scholars will find new inspirations and connections, while the general reader will open a window to a world that is just as wide as it is often unseen.

Arranged Marriage: The Politics of Tradition, Resistance, and Change shows how arranged marriage practices have been undergoing transformation as a result of global and other processes such as the revolution of digital technology, democratization of transnational mobility, or shifting significance of patriarchal power structures. The ethnographically informed chapters not only highlight how the gendered and intergenerational politics of agency, autonomy, choice, consent, and intimacy work in the contexts of partner choice and management of marriage, but also point out that arranged marriages are increasingly varied and they can be reshaped, reinvented, and reinterpreted flexibly in response to individual, family, religious, class, ethnic and other desires, needs, and constraints. The authors convincingly demonstrate that a nuanced investigation of the reasons, complex dynamics, and consequences of arranged marriages offers a refreshing analytical lens that can significantly contribute to a deeper understanding of other phenomena such as globalization, modernization, international migration as well as patriarchal value regimes, intergenerational power imbalances, and gendered subordination and vulnerability of women.

Becoming a Social Science Researcher is designed to help aspiring social scientists, including credentialed scholars, understand the formidable complexities of the research process. Instead of explaining specific research techniques, it concentrates on the philosophical, sociological, and psychological dimensions of social research. These dimensions have received little coverage in guides written for social science researchers, but they are arguably even more important than particular analytical techniques. Truly sophisticated social science scholarship requires that the researcher understand the intellectual and social contexts in which they collect and interpret information. While social science training in US graduate schools has become more systematic over the past two decades with numerous publications aimed at instruction, training and guidance still fall short in addressing the fundamental needs of this field.

Chinese economic growth is an extraordinary phenomenon that deserves an original analysis. It is explained here from the origins of the People's Republic to the present day. Original first, because the authors have themselves reconstructed, on the country studied, statistical databases in time series for the stock of physical capital, the stock of human capital, expenditure on research and development, and Gini income inequality index. Original then, because the methodologies used screen a very wide range of theoretical currents: neoclassical, Pickettyn, and Marxist. Original finally, because the most modern tools of statistics and econometrics are mobilized to carry out this research. This book is aimed at economists and an audience with a solid knowledge of economics.

Beyond hegemonic thoughts, the Post-Western sociology enables a new dialogue between East Asia (China, Japan, Korea) and Europe on common and local knowledge to consider theoretical continuities and discontinuities, to develop transnational methodological spaces, and co-produce creolized concepts. With this new paradigm in social sciences we introduce the multiplication of epistemic autonomies vis-à-vis Western hegemony and new theoretical assemblages between East-Asia and European sociologies. From this ecology of knowledge this groundbreaking contribution is to coproduce a post-Western space in a cross-pollination process where “Western” and “non-Western” knowledge do interact, articulated through cosmovisions, as well as to coproduce transnational fieldwork practices.

After the Second World War, Yugoslavia's small regional cities represented a challenge for the new socialist state. These cities' older buildings, local historic sites, and low-quality housing clashed with socialism's promises and ideals. How would the state transform these cities' everyday neighborhoods? In the Slovene republic's capital city of Ljubljana, the Trnovo neighborhood embodied this challenge through its modest housing, small medieval section, vast gardens, acclaimed interwar architecture, and iconic local reputation. *Imagining Slovene Socialist Modernity* explores how urban planners, architects, historic preservationists, neighborhood residents, and even folklorists transformed this beloved neighborhood into a Slovene socialist city district. Aplenc demonstrates that this urban redesign centered on republic-level interpretations of a Yugoslav socialist built environment, versus a re-envisioned Slovene national past or design style. This interdisciplinary study sheds light on how Yugoslav state socialism operated at the republic level, within a decentralized system, and on the diverse forces behind success or failure. With its focus on vernacular architecture, small-scale historic sites, single-family homes, and illegal housing, this book expands our understanding of the everyday built environment in socialist cities.

Russia's Muslims, numbering some 15 million, constitute far from a homogeneous sociopolitical group. So, what does it mean to be a Muslim in Russia today? How is the image of Islam constructed, and how do the country's Muslims - and non-Muslims - perceive and react to it? These are the questions that gave rise to this book. Using a multidisciplinary approach, the authors explore in what ways, and with what impact, Islam in contemporary Russia has been shaped by the interactions of the Soviet legacy, local cultures and languages, and external forces. They also address the influence of Islam on Russia's current Middle East policy. Their work is a rich and distinctive contribution to enhancing our understanding of the complexity and fluidity of Muslim identity in post-Soviet Russian politics and society.

While the Western was dying a slow death across the cultural landscape, it was blazing back to life as a video game in the early twenty-first century. Rockstar Games' Red Dead franchise, beginning with Red Dead Revolver in 2004, has grown into one of the most critically acclaimed video game franchises of the twenty-first century. Red Dead Redemption: History, Myth, and Violence in the Video Game West offers a critical, interdisciplinary look at this cultural phenomenon at the intersection of game studies and American history. Drawing on game studies, western history, American studies, and cultural studies, the authors train a wide-ranging, deeply informed analytic perspective on the Red Dead franchise—from its earliest incarnation to the latest, Red Dead Redemption 2 (2018). Their intersecting chapters put the series in the context of American history, culture, and contemporary media, with inquiries into issues of authenticity, realism, the meaning of play and commercial promotion, and the relationship between the game and the wider cultural iterations of the classic Western. The contributors also delve into the role the series' development has played in recent debates around working conditions in the gaming industry and gaming culture. In its redeployment and reinvention of the Western's myth and memes, the Red Dead franchise speaks to broader aspects of American culture—the hold of the frontier myth and the "Wild West" over the popular imagination, the role of gun culture in society, depictions of gender and ethnicity in mass media, and the increasing allure of digital escapism—all of which come in for scrutiny here, making this volume a vital, sweeping, and deeply revealing cultural intervention.

In *Russia in the Context of Global Transformations (Capitalism and Communism, Culture and Revolution)*, the authors focus on the dramatic changes in Russia's socio-economic system over the past hundred years. The contradictions of Russia's triumphs and tragedies are studied in connection with the shifts in the world economic system. Basing themselves on the views of the Post-Soviet School of Critical Marxism, the authors show the causes and consequences of the main shifts in Russia's development during the twentieth and twenty-first centuries. Topics addressed include the October Revolution, the contradictions of post-revolutionary development, the disintegration of the USSR, the collapse and stagnation during the post-USSR period and the prospects for overcoming contemporary problems.

The book presents a new history of the Slavs during the Middle Ages. Based on in-depth source analysis, it describes on the one hand the ‘factual’ historical structures that can be discerned behind the phenomenon of ‘the Slavs’ – from the ‘early Slavic’ population groups and their first formations of power in the 7th to 9th centuries, through the Slavic-speaking realms and nationes of the 10th to 12th centuries, to the late medieval societies of the 13th to 15th centuries. On the other hand, it analyzes external Byzantine, Latin and Arabic perceptions, as well as ‘Slavic’ self-imagery, with which the Slavs have been conceptualized or imagined as a cultural construct since the 6th century. Mühle further demonstrates that these images were already being instrumentalized for historical-political purposes in various contexts and for different purposes in the Middle Ages.

Speaking Yiddish to Chickens: Holocaust Survivors on South Jersey Poultry Farms

Most of the roughly 140,000 Holocaust survivors who came to the United States in the first decade after World War II settled in big cities such as New York. But a few thousand chose an alternative way of life on American farms. More of these accidental farmers wound up raising chickens in southern New Jersey than anywhere else. *Speaking Yiddish to Chickens* is the first book to chronicle this little-known chapter in American Jewish history when these mostly Eastern European refugees – including the author’s grandparents - found an unlikely refuge and gateway to new lives in the US on poultry farms. They gravitated to a section of south Jersey anchored by Vineland, a small rural city where previous waves of Jewish immigrants had built a rich network of cultural and religious institutions. This book relies on interviews with dozens of these refugee farmers and their children, as well as oral histories and archival records to tell how they learned to farm while coping with unimaginable grief. They built small synagogues within walking distance of their farms and hosted Yiddish cultural events more frequently found on the Lower East Side than perhaps anywhere else in rural America at the time. Like refugees today, they embraced their new American identities and enriched the community where they settled, working hard in unfamiliar jobs for often meager returns. Within a decade, falling egg prices and the rise of industrial-scale agriculture in the South would drive almost all of these novice poultry farmers out of business, many into bankruptcy. Some hated every minute here; others would remember their time on south Jersey farms as their best years in America. They enjoyed a quieter way of life and more space for themselves and their children than in the crowded New York City apartments where so many displaced persons settled. This is their remarkable story of loss, renewal, and perseverance in the most unexpected of settings.

The book is a collection of studies on the war in Ukraine. The considerations focus on different contexts of the first phase of the armed conflict. The authors try to answer questions about the motives and results of Russian disinformation and blaming Ukraine, the US and NATO for the invasion, as well as of the position of third countries towards the Russian aggression. One of the issues addressed is sexual violence in wartime and the image of women in armed conflict. The authors also analyze the aid provided by certain nations and Ukrainian national minorities in selected countries. Some chapters also examined public opinions on various war-related issues. Such a broad approach provides multidimensional view of the war while complementing earlier images of the conflict in Ukraine.

In *Zinoviy Otenskiy and the Trinitarian Controversy*, Viacheslav V. Lytvynenko and Mikhail V. Shpakovskiy offer the first English edition of two major Slavic works written by the eminent Russian theologian Zinoviy Otenskiy (d. 1571/2). The selected texts represent our chief source on the Trinitarian controversy in sixteenth-century Russia and reveal Zinoviy as a man of profound theological thinking and Biblical exegesis. The authors provide a detailed and welcome overview of the history of the Trinitarian controversy and the role that Zinoviy played in it. The readers will find here a comprehensive discussion of the issues related to the history of the edited texts, Zinoviy's sources, and his doctrines of the Trinity, Christ, and salvation.

Chris Cunneen

The police are viewed as guardians of public safety and enforcers of the law. How accurate is this? Given endemic police violence which is often aimed at racialised and minoritised groups and the failure of many attempts at reform, attention has turned to community-generated models of support. These include defunding the police and instead funding alternatives to criminalisation and incarceration. This book is the first comprehensive overview of police divestment, using international examples and case studies to reimagine community safety beyond policing and imprisonment. Showcasing a range of practical examples, this topical book will be relevant for academics, policy makers, activists and all those interested in the Black Lives Matter movement, protest movements and the renewed interest in policing and abolitionism more generally.

Why is finance so important? How do stock markets work and what do they really do? Most importantly, what might finance be and what could we expect from it?

Exploring contemporary finance via the development of stock exchanges, markets and the links with states, Roscoe mingles historical and technical detail with humorous anecdotes and lively portraits of market participants.

Deftly combining research and autobiographical vignettes, he offers a cautionary tale about the drive of financial markets towards expropriation, capture and exclusion. Positioning financial markets as central devices in the organization of the global economy, he includes contemporary concerns over inequality, climate emergency and (de)colonialism and concludes by wondering, in the market's own angst-filled voice, what the future for finance might be, and how we might get there.

Rejecting the assumption that housing and cities are separate from nature, David Clapham advances a new research framework that integrates housing with the rest of the natural world. Demonstrating the wider context of human lives and the impact of housing on the non-human environment, the author considers the impact of current inhabitation practices on climate change and biodiversity.

Showcasing the significant contribution that housing policy can make in mitigating environmental problems, this book will stimulate debate amongst housing researchers and policy makers.
